DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-16 rejected under 35 U.S.C. 103(a) as being unpatentable over Wrublewski et al. (US 6174309). Wrublewski et al. disclose a bipolar electrosurgical instrument comprising a handle, a body joined to the handle, a jaw assembly, a first sealing electrode (101), a second sealing electrode (102) and a cutting electrode (105). Wrublewski et al. teach all of the limitations of the claims except the sidewalls of the recess extending at an oblique angle to the width axis of the jaw assembly. To have provided the recess sidewalls of Wrublewski such that they extend at an oblique angle to the width axis of the jaw assembly would have been an obvious design choice to an artisan at the time the invention was made since, it has been held that the modification of the shape of a device requires only ordinary skill. **Regarding claims 3, 8 and 11** see col. 4 lines 7-12 and lines 45-47.

Response to Arguments

Applicant's arguments filed 8/23/04 have been fully considered but they are not persuasive. Applicant's argument that Wrublewski et al. has no disclosure of jaws having the shape configuration now being claimed is addressed in the rejection above. Regarding the argument that Wrublewski et al. does not teach or suggest a jaw shape that is effective to tension tissue as it is being squeezed between the jaws, see col. 4 lines 18-22.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
